68800	<a href="#">Microsoft Search: Reuse files in Word</a>	Reuse Files allows you to build your documents from existing content in other documents and presentations, without having to open the other file.	In development	9/22/2020	December CY2020
68801	<a href="#">Microsoft Search: Smart Find (Find-in-Document) in Word, Excel, and PowerPoint</a>	Search your document like you search the web. We're utilizing well-established web search technologies, such as query and document understanding, and adding deep learning based natural language models. This allows us to handle a much broader set of search queries beyond "exact match." Typos: When there is a misspelling in the query, search can now show related matches. For example, technician vs. technician. Forms of words: When there are different forms of the word in document and query. For example: tech, technology, technologies"; or USA, U.S.A. United States, United States of America, or newborn, new born, new-born, etc. Synonyms: For example: citation, quotation, quote, reference might be all the candidates for a term that you are searching for inside the document. A multi-word query: A single word query might lead to too many search results. A modern semantic search can often yield better results. For example: as a query of Oil Price, the content having Price of Oil, Prices of the Oil, Cost of Oil can offer related matches from within the document content.	In development	9/22/2020	December CY2020
68802	<a href="#">Microsoft Search: Q&amp;A in Microsoft Word</a>	With the recent breakthroughs in deep learning techniques, you can now go beyond the common search term-based queries. The result is answers to your questions based on the document content. This opens a whole new way of finding knowledge. When you're looking at a water quality report, you can answer questions like "where does the city water originate from? How to reduce the amount of lead in water?"	In development	9/22/2020	December CY2020
68803	<a href="#">Microsoft Search: User-centric report slicing for Microsoft Search Administrators</a>	User-centric report slicing enables the Search Administrator to gain better insights of their users by exposing the search query pattern(s) of an individual based on their geolocation, occupation and organization, and in turn, empowering the Search Administrator to undertake additional administrative action (i.e., bookmark management, addressing abandoned queries, promoting popular sites) to refine and improve the search experience.	In development	9/22/2020	December CY2020
68804	<a href="#">Microsoft Search: Improvements to Microsoft Graph APIs for Microsoft Search Administrators</a>	Provides Microsoft Search Administrators programmatic access to functionality in the Microsoft Admin Center as an alternative channel to configure and analyze search. 68805	<a href="#">Advanced Audit: optional 10 year audit log retention add-on</a>	To help meet rigorous regulatory and internal compliance obligations or conduct longer running investigations, organizations can now add 10-year audit log retention to Advanced Audit. Once enabled, you can access the logs in the Microsoft 365 compliance center or through the Office 365 Management Activity API. The events will also soon be accessible across Microsoft 365 compliance solutions. 10-year audit log retention is generally available and ES customers can try the feature today for a limited time at no additional cost. An add-on will be required from early 2021 to access this capability	Rolling out	9/22/2020	September CY2020
68806	<a href="#">Advanced Audit: User searches</a>	User search event, which is generated when a user search was performed on Exchange Online or SharePoint Online. This is valuable especially if a malicious actor accessed an account to search for sensitive material. By analyzing the search query, an investigator can understand the kind of content being searched for.	Rolling out	9/22/2020	September CY2020
68807	<a href="#">Advanced Audit: Mail send events</a>	Mail send event is generated when a user sends, replies to, or forwards an email. Whether the action was malicious or unintentional, this event can let investigators know what metadata was contained in the emails sent from a compromised account.	Rolling out	9/22/2020	September CY2020
68809	<a href="#">Microsoft Lists: Offline mode</a>	Similar to taking files offline, people will have the ability to take Microsoft Lists offline - so you can work with your information in scenarios where you may have low-to-no internet access.	In development	9/22/2020	December CY2020
68810	<a href="#">Microsoft Lists: Undo / redo</a>	As you work across rows and columns within Microsoft Lists, mistakes will happen and it needs to be easy to recover information. Similar to how you can remove sentences and phrases in a Word document, you will be able to do this in Lists by using the undo button. The same is true in reverse if there was something in a field previously that you want to bring back - just click the redo button.	In development	9/22/2020	December CY2020
68811	<a href="#">Microsoft Lists: @mentions in comments</a>	Get a colleague's attention to an item in a list by @mentioning them within list comments. That person will receive a notification and a link that takes them directly back to the item, to review the comment and take the requested action.	In development	9/22/2020	December CY2020
68812	<a href="#">SharePoint admin center: Updated homepage dashboard</a>	When you first land in the SharePoint admin center, we want it to be both familiar and useful at a glance. The idea is to provide a familiar experience, taking a similar design approach as the Microsoft admin center. You'll see more and more cards and graphs appear over time - so you can see insights on files, usage security, recommendations, training and so on. Better see what's happening, and then take the appropriate action.	In development	9/22/2020	December CY2020
68813	<a href="#">SharePoint admin center: Site creation source</a>	SharePoint admins will now be able to see where sites were created from - be it PowerShell, via the SharePoint admin center, from Teams, from SharePoint "Create site" - and to be able to see more clearly who created the site.	In development	9/22/2020	December CY2020
68814	<a href="#">SharePoint admin center: OneDrive settings</a>	To align with administration integration and consolidation, we've moved a number of the OneDrive settings into the SharePoint admin center. Admin will find settings for OneDrive storage limits, notifications, retention for deleted users and sync - all within the SharePoint admin center under "Settings."	In development	9/22/2020	December CY2020
68816	<a href="#">SharePoint admin center: Migration Manager: Box migrations (public preview)</a>	With our recent Mover acquisition, we are excited to expand our capabilities to allow moving content from third-party cloud storage providers starting with Box.com. When you're ready to move your content, click on the Migrate tab in the SharePoint admin center to start scan discovery, assessment, and migrate. You'll get detailed reports and the rest in a seamless transition of files and folders to Microsoft 365.	In development	9/22/2020	December CY2020
68817	<a href="#">Outlook for Mac: S/MIME</a>	Support for S/MIME - S/MIME (Secure/Multipurpose Internet Mail Extensions) is a widely accepted method (or more precisely, a protocol) for sending digitally signed and encrypted messages.
