

Feature ID	Description	Details	Status	Added to Roadmap	Estimated Release
70805	Microsoft 365 Compliance Center: New predictive coding module in Advanced eDiscovery	To help cull and reduce data, right where Microsoft 365 data is created, shared, and stored, legal practitioners can use our new predictive coding module without moving data outside the Microsoft 365 security and compliance boundary. As part of this preview release, legal practitioners can organize content for review faster by going through training rounds of relevant and non-relevant content to iteratively train and tune the model performance by starting with as little as 50 items. This is an improvement from traditional models that require customers to train upwards of 10 times more documents to get started and see the output of the model.	In development	2021-03-15	April CY2021
72062	Yammer: Establish Official Communities	Updated community settings on web for communities and All Company community.	In development	2021-03-15	March CY2021
80262	Microsoft Teams: Prevent PSTN attendees from unmuting in meetings	Presenters and Organizers can now prevent PSTN participants from unmuting. This change also allows PSTN participants to request to speak by raising their hand in a meeting via dial-pad command (press *5).	In development	2021-03-15	June CY2021
80464	Establish official communities in Yammer	Designate your most important communities as "Official" to show that they are company-endorsed within the network. (CEO Connections, Contoso News, IT Help, HR Support, LatinX Community).	In development	2021-03-15	April CY2021
81009	Excel, Word and PowerPoint: Contact cards accessible from Office Web when collaborating in real-time.	When working with others in an Office file at the same time you can now access people's contact card directly from within the Office Web Application. This is helpful if you want to email or chat with them or learn about their organization.	In development	2021-03-15	April CY2021
70733	SharePoint spaces: 360° tour annotation icon customization	Customize icons in 360° image tours with choice of icons, colors, and size.	In development	2021-03-16	April CY2021
70807	Microsoft 365 compliance center: New Advanced eDiscovery solution for DoD	The Advanced eDiscovery solution in Microsoft 365 builds on the existing eDiscovery and analytics capabilities in Office 365. This new solution, called Advanced eDiscovery, provides a workflow to identify, preserve, collect, review, analyze, and export content that's responsive to your organization's internal and external investigations. It also lets legal teams manage the entire legal hold notification workflow to communicate with custodians involved in a case.	In development	2021-03-16	April CY2021
80421	Microsoft Teams: Users can now search in meeting participants from the roster	From the search box in the roster, users can now search in meeting participants. They can continue to search for participants outside the meeting and request them to join the meeting.	In development	2021-03-16	April CY2021
80425	Microsoft Teams: Spotighting multiple Users at the same time in a meeting	Organizers and presenters can now spotlight up to 7 participants simultaneously during meetings.	In development	2021-03-16	April CY2021
80600	Microsoft Teams: Present from PowerPoint to Teams	Present your slides directly from PowerPoint for the web to a Teams meeting via PowerPoint Live.	In development	2021-03-16	April CY2021
80601	Microsoft Teams: Translate slideshow content	Translate the slide show content privately in a Teams meeting with PowerPoint Live	In development	2021-03-16	April CY2021
81354	Microsoft Teams: Related Content for Teams Meetings (iOS and Android)	Related Content makes meetings more effective by providing customers with important information from their mailboxes, OneDrive for Business and SharePoint sites. This helps them prepare before their meetings by offering them content they haven't had a chance to read or may want to revisit. During the meeting, they can easily access relevant content to share, present, or reference. After the meeting, they can catch-up on completed meetings by returning to content presented during the meeting, sent meeting notes, and other high-utility related content.	In development	2021-03-16	April CY2021
81381	Microsoft Teams: Outgoing participant video in meetings in Safari	Users can now use camera during meetings in Safari. Requires Safari 14 or higher.	In development	2021-03-16	March CY2021
70720	SharePoint: People cut out tab for stock images	The stock images tab inside the image file picker will now include images of people without a background.	In development	2021-03-17	March CY2021
70721	Microsoft 365 Compliance Center: Advanced eDiscovery case limits enhancements	Advanced eDiscovery will soon expand the limits for collection size and review set volume. The limits expansion will expand the collection size from 300GB currently to 1TB and will expand the review set capacity as well to accommodate large case volumes. This update will help ensure organizations are able to manage their eDiscovery process across very large data sets effectively with Advanced eDiscovery.	In development	2021-03-17	September CY2021
70792	SharePoint: Scoping Control for SharePoint Online	Scoping control is available for SP page, site, list and library, for users to search faster with specified scope.	In development	2021-03-17	April CY2021
70795	SharePoint Syntex: Content type synchronization enhancements	Changes to the way content type publishing works in SharePoint, moving from a "push everywhere" model to a "pull as needed" model to help improve reliability and performance of the service.	In development	2021-03-17	May CY2021
72174	Outlook: MyDay pane available in Office.com	The MyDay pane from Outlook is now available to users in Office.com. The MyDay pane allows users to quickly glance at their Outlook calendar, join meetings and monitor their To Do list.	In development	2021-03-17	March CY2021
72175	SharePoint: Microsoft Lists: Visualize with Power BI	Visualize your list in Power BI. This is a new view and author experience that auto-generates an initial report for you based on the information in your list. You can specify fields to create from, or update the visuals shown in the report. If you want more advanced report authoring capabilities, you can move into Edit mode and further refine. To create a report from a list, click the Integrate menu, choose Power BI and then you will see "Visualize the list".	In development	2021-03-17	June CY2021
80385	Microsoft Teams: Improved Experience in the Meeting Participant Roster	We are now changing how the participant list is displayed in a Teams meeting for the Lobby, In meeting, Presenters, and Attendees participant sections. A maximum of 20 participants for each of the sections will be displayed in the initial view, with an option to drill in and view more participants within that section. For the lobby, you can review the full list before you admit all into the meeting. The roster will display details of most active participants in the meeting arranged in alphabetical order. There are no changes to the participants action menu.	In development	2021-03-17	March CY2021
81359	Microsoft Teams: Supervised chat	Use Teams administrative policy to ensure students are supervised by an educator during private 1:1 or group chats. With Supervised Chat, students will not be allowed to engage in chats without a supervising educator present.	In development	2021-03-17	April CY2021
70808	SharePoint and Microsoft Teams: Rich previews for pages and news articles	When users paste links to SharePoint news posts and modern pages in Teams chat/channels, those links will convert into rich cards displaying the page title, image, author and published date.	In development	2021-03-18	June CY2021
70815	SharePoint: Audience Targeting capability for Events Web Part	We are adding the ability to target specific audiences per event within the Events Web Part. With it, you target specific events to different audiences, helping you provide more personalized experiences on SharePoint pages.	In development	2021-03-18	March CY2021
72171	Microsoft Information Protection: Configure sensitivity labels for encrypt-only protection on Outlook messages	In the Microsoft 365 compliance center, you can now create labels that enforce the encrypt-only restriction (available within Office 365 Message Encryption) when applied to Outlook email messages. With encrypt-only, users can send encrypted email to any recipient, whether they are inside or outside the organization, and the protection follows the lifecycle of the email.	In development	2021-03-18	March CY2021
72195	Microsoft Project: Import Project desktop files to Project for the web	Use a button on the Project Home to import your .mpp files into Project for the web	In development	2021-03-18	May CY2021
80568	Universal Print: Universal Print Service General Availability for V1.0	Universal Print is generally available in March 2021. This promotes the existing (Microsoft Graph) beta API surface to v1.0. ISV and IHV partners can build more confidently on a Universal Print API surface that fully supported, stable, and immutable. Print management, printer share management, print job management, 3rd party integration, reporting and service configuration.	In development	2021-03-18	March CY2021
80599	Microsoft Teams: Present from PowerPoint to Teams	Present your slides directly from PowerPoint for Windows into a Teams meeting via PowerPoint Live.	In development	2021-03-18	April CY2021
80669	Microsoft Teams: Lock a meeting from additional joins	In the Teams meetings desktop app experience, organizers can choose to lock their meetings to prevent subsequent join attempts. Anyone attempting to join a lock meeting from any device will be informed that the meeting is locked.	In development	2021-03-18	May CY2021

70805	Microsoft 365 Compliance Center: New predictive coding module in Advanced eDiscovery	To help cull and reduce data, right where Microsoft 365 data is created, shared, and stored, legal practitioners can use our new predictive coding module without moving data outside the Microsoft 365 security and compliance boundary. As part of this preview release, legal practitioners can organize content for review faster by going through training rounds of relevant and non-relevant content to iteratively train and tune the model performance by starting with as little as 50 items. This is an improvement from traditional models that require customers to train upwards of 10 times more documents to get started and see the output of the model.	In development	2021-03-15	April CY2021
81372	Microsoft Teams: Breakout Room Timer and Room assignment retention	Organizers can now set a timer for Breakout rooms from the Breakout Room settings. After timer has expired, rooms will automatically close and participants will come back to the main meeting. Room assignment retention provides the ability to persist room configuration and assignment over multiple sessions. With participant reassignment capability, organizer will now be able to move joined participants across rooms and main meeting also when rooms are opened.	In development	2021-03-18	March CY2021
81376	Microsoft Teams: New bypass lobby option	Meeting policies have a setting for letting users bypass the meeting lobby. We added an option for People in the organization but exclude guest users.	In development	2021-03-18	March CY2021
70722	Microsoft Information Protection: Exact Data Match to support Customer Managed Key (Public Preview)	Customers will be able to encrypt Exact Data Match (EDM) data using their own Customer Managed Key (CMK), further enhancing EDM data security. EDM content that is encrypted using the CMK includes the data file schemas, rule packages, and the salts, which are used in hashing the sensitive data being protected.	In development	2021-03-19	March CY2021
72176	SharePoint Syntex: Form processing - support for custom Power Platform environments	When using Form Processing model, you'll be able to specify that AI Builder and Dataverse storage can be hosted in custom Power Platform environments. Previously, this was limited to the default tenant environments.	In development	2021-03-19	March CY2021
72177	SharePoint Syntex: Document understanding model improvements – extractor rename; model rename & duplication support	We're adding support for renaming and duplicating Syntex document understanding models. You'll also be able to rename data extractors inside models.	In development	2021-03-19	March CY2021
72178	SharePoint Syntex: Document understanding model improvements – consolidated explanation types	We're streamlining the types of explanations used in document understanding to improve usability for model designers.	In development	2021-03-19	March CY2021
72179	SharePoint Syntex: Syntex license expiration - disable experiences in UX	Upon expiration of Syntex user licenses, we'll be disabling model building and model usage experiences for unlicensed users in the user interface.	In development	2021-03-19	March CY2021
72190	Azure Active Directory: Access Tokens issued by Azure AD will have lifetime of 60-90 minutes.	Access Tokens issued by Azure AD will have default lifetime between 60-90 minutes.	In development	2021-03-19	May CY2021
72194	Microsoft Compliance center: New named entities SITs and enhanced unified policy authoring templates (Public Preview)	Named entities are sensitive information types (SITs) that can't easily be identified by a regular expression or a function; these include person names, physical addresses, and medical terms & conditions. This update adds 52 new SITs representing named entities, and 10 enhanced policy templates that can be used in solutions such as DLP and auto-labeling, and cover important regulations, such as US HIPAA and EU GDPR.	In development	2021-03-19	April CY2021
80668	Microsoft Teams: Join a meeting by digital code	User can join a meeting by entering a digital code.	In development	2021-03-19	April CY2021
81113	Microsoft Teams: Reply to a specific message	When chatting in Teams, you will be able to reply a specific message. The original message will be quoted in the reply text box, helping everyone in the chat to more easily understand the message's context.	In development	2021-03-19	April CY2021
81403	Microsoft Teams: Expanded Emoji Picker	The expanded emoji update offers people more fun and expressiveness in Teams. It also introduces a wider range of diversity and representation. The emoji set has expanded from 85 to over 800 emojis, with a category selector, skin tone selector and short code picker.	In development	2021-03-19	April CY2021
81407	Microsoft Teams: Adobe Sign Integration in Approvals App	There may be times when you need something approved and recorded with more formal attestation, and adding signatures to the approval process is necessary. We're working closely with key partners to allow you to create an electronic signature approval using Adobe Sign, DocuSign, and other 3rd party providers natively within the Approval app. Simply choose your electronic signature provider and add the details. Once submitted, signers are notified with an email and can easily review and sign. Approvals will keep track of the entire workflow right in context within Teams.	In development	2021-03-19	April CY2021
81408	Microsoft Teams: Approvals Templates	User can simply choose a template provided by their tenant admins or a Team Owner when creating a new approval request.	In development	2021-03-19	April CY2021
81657	Microsoft Teams: Adobe Sign Integration in Approvals App for GCC-High and DoD	There may be times when you need something approved and recorded with more formal attestation, and adding signatures to the approval process is necessary. We're working closely with key partners to allow you to create an electronic signature approval using Adobe Sign, DocuSign, and other 3rd party providers natively within the Approval app. Simply choose your electronic signature provider and add the details. Once submitted, signers are notified with an email and can easily review and sign. Approvals will keep track of the entire workflow right in context within Teams.	In development	2021-03-19	June CY2021
81658	Microsoft Teams: Approvals Templates for GCC-High and DoD	User can simply choose a template provided by their tenant admins or a Team Owner when creating a new approval request.	In development	2021-03-19	June CY2021
