Feature ID	Description	Details	Status	Added to Roadmap	Estimated Release
72172	Microsoft Information Protection: Outlook support for DisableMandatoryInOutlook and OutlookDefaultLabel settings	Outlook clients will now support the advanced Azure Information Protection (AIP) settings DisableMandatoryInOutlook and OutlookDefaultLabel.	In development	2021-03-22	March CY2021
72192	Microsoft Information Protection: Auto-classification with sensitivity labels in SPO, EXO, OneDrive for DoD	Auto-classification with sensitivity labels in OneDrive, SharePoint Online, and Exchange Online will soon be available in DoD environments. Sensitivity labels are central to Microsoft Information Protection, enabling you to label important content to associate it with protection policies and actions like encryption and visual marking. With this release, you can start using sensitivity labels at scale for documents stored on OneDrive and SharePoint Online, and for emails in transit in Exchange Online automatically without manual user input.	In development	2021-03-22	April CY2021
72196	Whiteboard: Now on Android	Microsoft Whiteboard provides a freeform intelligent canvas where teams can ideate, create, and collaborate visually via the cloud. Microsoft Whiteboard allows you to write or draw as smoothly as you would with ink, touch, type or pen, while adding text and sticky notes you can type and annotate on. Introducing Microsoft Whiteboard on Android enhances teamwork by allowing all team members to edit and comment directly on the canvas in real time, no matter where they are.	In development	2021-03-22	March CY2021
72200	Power BI: New sharing experience	We're introducing a new sharing capability in Power BI that will allow reports to be shared with people within the organization through shareable links.	In development	2021-03-22	April CY2021
72202	Microsoft Compliance Center: Service optimizations for Audit search	This update provides various service optimizations for Audit search, including speed and workflow improvements. For example, you can track status of the searches.	In development	2021-03-22	June CY2021
70798	Microsoft 365 Compliance Center: Microsoft Information Protection & Governance now supports 7 languages for the Threat, Targeted Harassment and Profanities classifiers	Trainable classifiers in Information Protection & Governance can now detect threat, targeted harassment, and profanities in the following languages: English, French, Spanish, German, Portuguese, Italian, Japanese, and Chinese.	In development	2021-03-24	May CY2021
72180	Microsoft Viva: Topics in Microsoft Search in Bing	Display topic cards in search results when Microsoft Search is invoked from a Bing search.	In development	2021-03-24	May CY2021
72181	Microsoft Viva: Support for types of topics	Support for categories or types of topics, such as projects, products or organizations.	In development	2021-03-24	July CY2021
72182	Microsoft Viva: Improvements for Topic Management	This update will empower Knowledge Managers, providing additional metadata for sorting and filtering through the list of topics, including additional quality and usage columns, and segmentation to help manage topics at scale.	In development	2021-03-24	December CY2021
72183	Microsoft Viva: Resolve topic name similarities	Allows users to select a topic among several when they share similar or matching names (disambiguation).	In development	2021-03-24	December CY2021
72184	Microsoft Viva: Topics in Yammer - Preview	Display topic highlights and access topic cards in Yammer conversations.	In development	2021-03-24	December CY2021
72186	Microsoft Viva: Extended language support	Support for topic identification from content authored in additional languages.	In development	2021-03-24	December CY2021
72187	Microsoft Viva: Graph connected content indexed into topic card - Preview	Preview - Include content from Microsoft Graph Connectors MediaWiki and ServiceNow for topic discovery.	In development	2021-03-24	December CY2021
72203	Microsoft Defender for Identity: Alert exclusion in Microsoft 365 security center	One of the most widely used features relating to alerting in Defender for Identity is being able to tune them and make sure you are only alerted on what should be getting your attention. With the exclusion capability landing in Microsoft 365 security center for Defender for Identity, you can tune the alerts and filter the detections based on entities that matter to you. We are also improving the experience in the allow-list functionality, making sure you can allow entities across all detections as opposed to allowing them per detection.	In development	2021-03-24	July CY2021
72204	Microsoft Compliance Center: Communication Compliance for DoD	Communication Compliance is an insider risk solution in Microsoft 365 that helps minimize communication risks by helping you detect, capture, and act on inappropriate messages in your organization.	In development	2021-03-24	May CY2021
81391	Microsoft Teams: Co-organizer Meeting Role	Organizers will now be able to share control by assigning the new "Co-organizer" role to people they invite. Co-organizers will have almost all of the capabilities of the organizer, including management of Meeting Options.	In development	2021-03-24	June CY2021
81575	Microsoft Teams: Out of Office for GCC-High and DoD	Set up a message to let others know you're not working or on vacation so you're not available to reply when they send a chat message. Your out of office status will also sync with Automatic Replies that are found in your Outlook calendar.	In development	2021-03-24	April CY2021
81676	Microsoft Teams: Co-organizer Meeting Role for GCC-High and DoD	Organizers will now be able to share control by assigning the new "Co-organizer" role to people they invite. Co-organizers will have almost all of the capabilities of the organizer, including management of Meeting Options.	In development	2021-03-24	September CY2021
70802	Outlook: Introducing suggested replies in Outlook for Windows	When you receive a message in email that can be answered with a short response, Outlook may suggest three responses that you can use to reply with a couple of clicks. This capability already exists in Outlook on the web, and in Outlook iOS and Android.	In development	2021-03-25	March CY2021
72188	Microsoft Viva: Discover experts and answers from Topics	Questions on topics will receive automated answers or get referred to subject matter experts.	In development	2021-03-25	December CY2021
80721	Microsoft Teams: Share to Teams from Outlook	Share to Teams from Outlook allows you to send a copy of email messages or conversations, including attachments, into Teams chats and channels. Find the Share to Teams option in the Outlook ribbon or the action menu for an email. Share to Teams supports Outlook on the web, Outlook for Windows, and the new Outlook for Mac Preview.	In development	2021-03-25	March CY2021
70811	Office App: Office App for Desktop Improvements	Performance and usage updates to the Office App for Desktop.	In development	2021-03-26	June CY2021
