

| Feature ID | Description | Details | Status | Added to Roadmap | Estimated Release |
|------------|---|--|----------------|------------------|-------------------|
| 70744 | Defender for Office 365: Updates to Management Activity API | We are introducing additional data within Email detection details like Authentication information, Override details, Additional Actions, Phish confidence level and other details for efficient investigation. | In development | 17-May-2021 | June CY2021 |
| 82643 | Microsoft Teams: Lower all raised hands | Meeting organizers and presenters will see an option to lower all raised hands from the participant pane. | In development | 17-May-2021 | June CY2021 |
| 80674 | Microsoft Forms: Auditing events in Gov environments | This update will enable Auditing for Forms events in Government environments. | In development | 17-May-2021 | June CY2021 |
| 81984 | Microsoft Forms: Shorten URL in response link | Enable Forms Short URL in Gov and DoD environment. | In development | 17-May-2021 | June CY2021 |
| 55001 | Visio: New start page for Visio on Office.com | We've leveraged some of the powerful features of Office.com—like improved file discovery, enhanced collaboration features, and better template categorization—to provide Visio for the web users with a familiar start experience similar to other apps in the Office 365 ecosystem. By clicking on "More templates," users will be directed to a new page complete with templates and sample diagrams and a new search experience to enable users to quickly find the right template based on relevant search terms. | In development | 18-May-2021 | May CY2021 |
| 82243 | Yammer and Microsoft Teams for Business: Customize branding & link previews | Microsoft Teams admins can customize the branding for the Yammer Communities app for Microsoft Teams to suit their Yammer network with their preferred app logos, naming, accent color, and more. With this Communities app for Microsoft Teams, users see a rich Yammer preview in chats and channel conversations when the user pastes a URL of a conversation from a public Yammer community. | In development | 18-May-2021 | June CY2021 |
| 81837 | Microsoft Forms: File upload question is available in GCC, GCC-High, and DoD | Form designers are able to add file upload questions in Microsoft Forms to collect respondents' uploaded file in GCC, GCC-High, or DoD environment. | In development | 18-May-2021 | June CY2021 |
| 81957 | Microsoft 365 admin center: Allow Non-Admin User to Install Language Access Packs | This new group policy, <i>AllowNonAdminUserInstallLAPs</i> , setting controls whether users can install language accessory packs for Office even if they don't have local administrator permissions on their devices. By default, Office users must have local administrator permissions on their devices to install language accessory packs. This policy will be applicable to the following products: Outlook, Word, Excel, PowerPoint and OneNote. | In development | 18-May-2021 | July CY2021 |
| 81960 | Microsoft 365 admin center: Reports in the Admin Center - Project & Visio Usage Report | Two new reports will be made available to help customers understand how Microsoft Project and Microsoft Visio are used within their organization. | In development | 18-May-2021 | September CY2021 |
| 81987 | Microsoft Information Protection: Exact Data Match to support Customer Managed Key | Customers will be able to encrypt Exact Data Match (EDM) data using their own Customer Managed Key (CMK), further enhancing EDM data security. EDM content that is encrypted using the CMK includes the data file schemas, rule packages, and the salts, which are used in hashing the sensitive data being protected. | In development | 18-May-2021 | June CY2021 |
| 81988 | Microsoft Information Protection: Exact Data Match to support Customer Managed Key | Customers will be able to encrypt Exact Data Match (EDM) data using their own Customer Managed Key (CMK), further enhancing EDM data security. EDM content that is encrypted using the CMK includes the data file schemas, rule packages, and the salts, which are used in hashing the sensitive data being protected. | In development | 18-May-2021 | July CY2021 |
| 82959 | Microsoft Teams: Large gallery layout update on Teams mobile | To provide a better experience for our Large Gallery for meetings on Teams mobile, we are introducing a mobile-optimized layout that let you swipe through all the participants in a meeting. | In development | 19-May-2021 | June CY2021 |
| 83113 | Microsoft 365 admin center: M365 Groups - Group Driven Membership Management | With this in-product feature support, end users and admins will be able to add a Security Group or an M365 Group as a member of an M365 Group. The release will be made in phases – one O365 app at a time will start supporting the nesting ability and eventually be expanded to all Office applications. | In development | 19-May-2021 | December CY2022 |
| 81482 | Microsoft Teams: Direct guest join for Zoom and Webex meetings on video-enabled certified Teams Android devices | Direct guest join (aka Third-party meeting join) is an ability to join meetings of other meeting providers from Microsoft Teams. Third-party meetings will appear on the Teams calendar and users will be able to join them the same way they join any other Teams meeting. This functionality will be limited to video-enabled certified Teams Android devices and will support only Zoom and Webex meetings. | In development | 19-May-2021 | September CY2021 |
| 81985 | SharePoint: Integration of Power Automate and Power Apps for DoD tenants | Power Automate and Power Apps will be available for SharePoint DoD customers. Users can automate common tasks, customize forms, create apps from lists, and use the Power Apps web part. | In development | 19-May-2021 | June CY2021 |
| 81986 | SharePoint: Display images from Microsoft Lists in Power Apps | Power Apps image controls will now display images that are stored in Microsoft Lists Image columns. They can be displayed in four sizes: small, medium, large, or full. | In development | 19-May-2021 | June CY2021 |
| 81990 | OneDrive and SharePoint for Business: Library Dropdown | We're adding a dropdown that allows you to easily switch between multiple document libraries associated with a Team or Site. | In development | 19-May-2021 | July CY2021 |
| 82812 | Microsoft Teams: Video Streams Out via AJA or Blackmagic Design Hardware | Isolated video streams can be sent out of Teams meetings via AJA and Blackmagic Design hardware devices. | In development | 21-May-2021 | June CY2021 |
| 82969 | SharePoint: Editing Modern Pages in Teams Experience | Edit Modern SharePoint Pages that are pinned to Teams channels & conversations. | In development | 21-May-2021 | June CY2021 |
| 83013 | Microsoft Teams: Large Gallery for VDI | Large Gallery feature will enable a Teams meeting participant to see an expanded view of the meetings gallery with 7x7 = 49 simultaneous user video streams in a Teams meeting. | In development | 21-May-2021 | June CY2021 |
| 83014 | Microsoft Teams: Dual-tone multi-frequency support for VDI (Citrix only) | Dual-tone multi-frequency (DTMF) for Teams on Citrix dial an outside number via dialer. Call is connected but DTMF is not sent. For example, if user is trying to use Teams to join a Teams meeting by dialing the PSTN number, the conference ID cannot be entered. | In development | 21-May-2021 | June CY2021 |
| 83043 | Outlook: Pin emails on Android and iOS | Do you pin emails in Outlook on the Web? We've got your back. You can now find your pinned emails using the filter button at the top of the message list. You can pin new emails by setting up a Pin swipe action in settings, or by tapping the ... in the top right corner of the reading pane. | In development | 21-May-2021 | May CY2021 |
| 83486 | Microsoft Teams: Video Streams Out via AJA or Blackmagic Design Hardware for GCC-High and DoD | Isolated video streams can be sent out of Teams meetings via AJA and Blackmagic Design hardware devices. | In development | 21-May-2021 | July CY2021 |
| 81989 | Microsoft 365 Admin Center: Microsoft Browser Usage Action Flow | The Microsoft browser usage report shows which browsers people use to access Microsoft 365. New functionality is being added to enable global administrators to create messages to notify their users who are still using Microsoft 365 services on Internet Explorer, which will be unsupported from August 17, 2021. This targeted message is designed to help users learn more about Microsoft Edge and the provided link contain information on easy steps to follow to switch browsers. This is available for US tenants only. | In development | 21-May-2021 | June CY2021 |
| 81991 | Microsoft Defender for Office 365: Detonation Details for GCC and DoD environments | Detonation details will be exposed within the email entity page for malicious URLs and files which got detonated. These detonation details will contain detonation chain, summary, indicators of compromise, screenshots, and behavior details. Customers can now go through the detonation details and expand their scope of investigation. | In development | 21-May-2021 | June CY2021 |
| 81992 | Microsoft Defender for Office 365: Email entity page for GCC and DoD environments | The email entity page will contain information in parity with existing email details flyout in protection.office.com from Threat Explorer, along with new information regarding authentication and detections, a revamped email preview capability for cloud mailbox emails, and detonation details for related files or URLs. These updates eliminate the need to traverse multiple experiences to view email details. The Email entity page brings a new look to your email investigations, designed to provide a 360-degree view of an email. | In development | 21-May-2021 | May CY2021 |
| 81996 | Outlook: New languages for suggested replies in web and mobile | We are adding support for suggested replies in Czech, Swedish, and Chinese (traditional) in Outlook on the web and mobile. | In development | 21-May-2021 | May CY2021 |
